Andrew Shidel
CS 350 Assignment #3
Test/Survay Taking program

Running the program:
1). Import and run the project from Eclipse
      or:
2). Run "ant run" from the command line.
3). Run "java MainMenu" from the bin directory.

Method used for saving Documents:
I chose to use the build in object serialization methods for storing Documents.
The test files can be found in ./Documents and ./bin/Documents. Both locations
contain the same files. The save location depends on where you are running the
program from.

Documentation:
See ./docs/index.html
